

Why Design Is Hard - the book

Scott Berkun & Bryan Zug

whydesignishard.substack.com

**WE WANT BETTER DESIGNED
PRODUCTS, GOVERNMENTS,
SYSTEMS AND SOCIETIES**

HOW DESIGN MAKES THE WORLD (2020)

1. Explain good design to anyone
2. Be the best starter book
3. Diversify stories and references

The four questions of design:

1. What are you trying to improve?
2. Who are you trying to improve it for?
3. How will you ensure you are successful?
4. Who might be hurt by your work? Now or in the future?

SCOTT BERKUN
HOW DESIGN MAKES THE WORLD

"Design impacts everyone, but does everyone understand good design? If they read this book, they will."
Sam Aquillano, Executive Director, Design Museum Foundation

MAKES 
THE 
WORLD 

SCOTT BERKUN

WHY DESIGN IS HARD (2024)

1. Written for designers (tough love)
2. Reframe frustrations into action
3. Focus on power and influence
4. Low pretense, informal and fun

Paula Scher's \$1.5 Million Sketch

Paula Scher's \$1.5 Million Sketch

"The design... is never really the hard part... it is persuading...people to use it.

...to get either an individual, a group of people, or a whole corporation to be able to see... there were a million meetings trying to get buy in."

Abstract: The Art of Design | Paula Scher

Flawed assumptions we commonly have:

- Design is valued and leaders know how to leverage it
- Better design is good for the business model
- There is a healthy process for making project-level decisions
- The organization is free from chronic political tensions
- People will give up their favorite parts of their jobs to us
- Leaders will quickly trust us with strategic decisions
-

Flawed assumptions we commonly have:

- Design is valued and leaders know how to leverage it
- Being a designer is good for the business model
- There is a healthy process for making project-level decisions
- The organization is free of chronic political decisions
- People will pick up the unwritten parts of their jobs for us
- Leaders will quickly trust us with strategic decisions

THE THREE CHOICES

A) **Power.** To design you need the power to make decisions.

B) **Influence.** Without power, you must persuade the powerful.

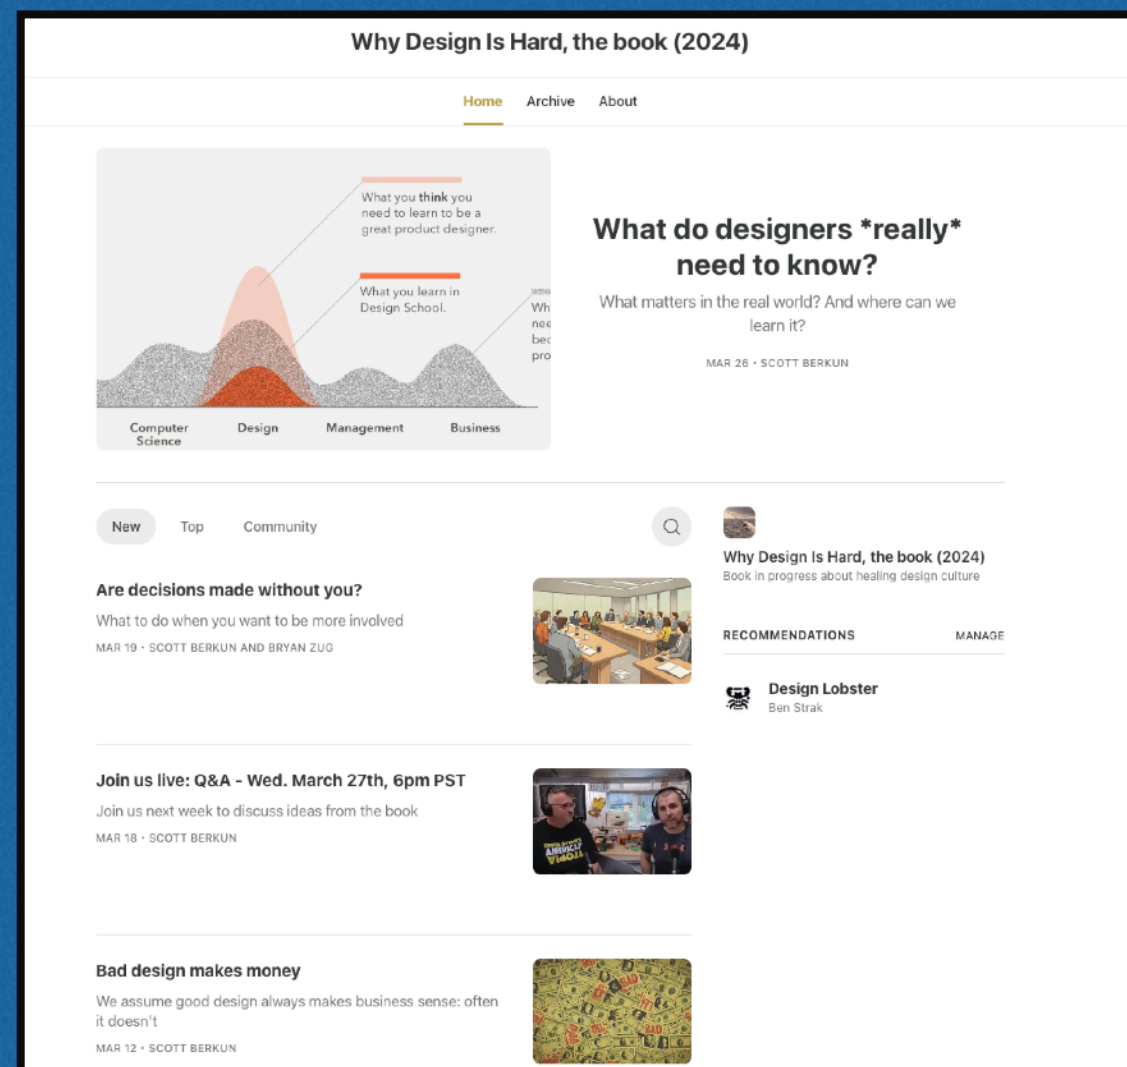

C) **Be self-aware.** If you don't want power or influence, accept your situation.

Instead... lets be realistic!

- You will explain design basics forever – enjoy it
- Politics is human nature – embrace it
- See organization as systems so they can be navigated
- We will have to earn trust before we gain influence

Q&A

Why Design Is Hard - the book

whydesignishard.substack.com
(new post every Tuesday)

The situations

- No one knows what you do
- You are told there isn't time for UX
- Decisions are made without you
- No one takes your suggestions
- Someone challenges you on UX basics
- They think a tool can replace your job
- The resources you were promised disappear
- You get a seat at the table, but it's chaos
